CAREER OBJECTIVE

Dedicated and curious Computer Science and Engineering undergraduate student. Currently in my final year of Engineering. I have strong problem-solving abilities and a solid foundation in web development. I am committed to continuous learning and delivering high-quality work in every project I undertake.

ACHIEVEMENTS

- Secured **3rd place** in Mathethon at GTBIT.
[Certificate](#) .
- **Top 17 finalist** (out of 250+ teams) in HackMait 6.0 .
[Certificate](#)
- Participated in an **ExcelR-certified** Program focused on real-world case studies.
[Certificate](#)
- Completed project-based training on **Smart Kitchen IoT** using ThingWorx Foundation.
[Certificate](#)
- Completed project-based training on **Industrial Communication Protocols & Connectivity**.
[Certificate](#)
- Solved Over **200+ Coding Problems** on Different Coding Websites.

TECHNICAL SKILLS

- **Programming Languages**
Java , Python , Javascript
- **Frameworks & Libraries**
HTML , CSS , ReactJS , Tailwind CSS , NodeJS , ExpressJS , Bootstrap
- **Version Control**
Git , Github
- **Other Tools**
Postman , VS Code , Vercel
- **Database**
MongoDB

COURSE WORK

- Data Base Management System
- Computer Networks
- Object-Oriented Programming
- System Design
- Operating System

EDUCATION

B.Tech. (CSE) - 62.2%

Maharishi Dayanand University

📅 2022 – 2026 📍 Rohtak, Haryana

Higher Secondary - 67.2%

Govt. co-ed Sarvodaya Vidyalaya

📅 2022 📍 Sec-4 Rohini, Delhi

Secondary - 62.8%

Govt. co-ed Sarvodaya Vidyalaya

📅 2020 📍 Sec -4 Rohini, Delhi

PROJECTS

Cause Connect

🐙 [Github](#) 🚀 [Live Project](#)

- React.js | Redux | Tailwind CSS | Node.js | Express.js | MongoDB | JWT | Bcrypt | Cloudinary | REST APIs
- The platform allows users to discover social-impact causes through dynamic listings, category-based filtering, and an intuitive interface. It includes secure user authentication, donation-flow simulation, cloud-based media handling, and a fully responsive design for smooth use across devices, all supported by a scalable backend for reliable performance.

StudyNotion

🐙 [Github](#) 🚀 [Live Project](#)

- React.js | Redux | Tailwind CSS | Node.js | Express.js | MongoDB | JWT | Bcrypt | Cloudinary | Razorpay | REST APIs
- An ed-tech platform that supports course creation, consumption, and rating with secure authentication, role-based access, and payment-enabled enrollment. It includes cloud-based media handling, personalized dashboards, and scalable backend architecture. It delivers a smooth learning experience for students and simple course management for instructors.

Wiggles

🐙 [Github](#) 🚀 [Live Project](#)

- React.js | Redux | CSS | Node.js | Express.js | MongoDB | JWT | Bcrypt | Cloudinary | REST APIs
- Smart pet-care platform that simplifies pet identification and safety through QR-enabled profiles, cloud-stored vaccination records, and a Lost Mode feature for instant recovery support. The application integrates secure authentication, cloud media uploads, and a responsive architecture.
